## Biochemistry

Test	Result	Unit	Biological Ref. Interval
SGPT	H 77.8	U/L	00 - 45
C - Reactive Protein (CRP) <small>Turbidimetry Method</small>	H 41.8	mg/L	0 - 5

### Note:

CRP is an acute phase reactant which is used in inflammatory disorders for monitoring course and effect of therapy. It is most useful as an indicator of activity in Rheumatoid arthritis, Rheumatic fever, tissue injury or necrosis and infections. As compared to ESR, CRP shows an earlier rise in inflammatory disorders which begins in 4-6 hrs, the intensity of the rise being higher than ESR and the recovery being earlier than ESR.
